

Range of Decors

This selection represents our standard work surface offerings. A broader range of Max Resistance² decors is available, with extended lead times.

Swatches shown are digital representations of color and finish. We recommend reviewing a physical sample prior to making a final selection. For additional information about Fundermax products, please visit www.fundermax.us. Phenolic resin surfaces from other manufacturers are also available.

Max Resistance²

Max Resistance² combines the very best intrinsic qualities: extreme resistance to the most aggressive chemicals, inherent strength, long lasting durability, and an easy-to-clean surface. With the unique RE surface technology, Max Resistance² is the work surface choice for the most extreme laboratory conditions. Max Resistance² not only meets the standards set by SEFA 3, it surpasses them. Available with color through core or deep black core.
